Projects

Animation sound, notification dashboard for MassanSC

September 2015 to Present

Members: maximilian lloyd, jacob vad

A system that let's the streamer, massanSC. Play animations. Play sounds. Get notifications about who has subscribed and this integrates with a point system we have built for him. The viewers gain points as they watch and can spend those points to get sounds played and animations played or send him a message. the message will be displayed on the dashboard and will also show what type of message it is. <http://www.twitch.tv/massansc>.

CLR page for MassanSC #1

September 2015 to Present

Members: maximilian lloyd

I made a CLR page for a streamer called MassanSC. He is a very big streamer on the service twitch,tv <http://www.twitch.tv/massansc>. It pops up every 7 minutes and displays information about his social sites.

CLR page for MassanSC #2

October 2015 to Present

Members: maximilian lloyd

Another clr page i made for massanSC. A variant of the one mentioned above.

Small blog for school project

October 2015 to Present

Members: maximilian lloyd

this is a small website/blog i made in a few hours for a school project.

Personal Website

April 2015 to Present

Members: maximilian lloyd

This is my personal website. I made it a while ago and i am planning to rework it in the near future.

Web Scraper

Members: maximilian lloyd

This is a web scraper i made that retrieves all images from sub reddits the user inputs. it also provides a simple API.

Chat statistics for massanSC

July 2015 to Present

Members: maximilian lloyd

A complete chat statistics application to monitor twitch.tv chat activity. It provided you with details such as most used commands, most used emotes, etc. I Worked as a front end developer.

text to JSON command line utility

October 2015 to Present

Members: maximilian lloyd

A command line utility that enables you to convert text files to JSON format. It provides several options for how you may wish to convert it.
